BORDERLAND SCIENCES RESEARCH ASSOCIATES
3524 Adams Ave., San Diego 16, Calif.
September 20, '51.

FOR THE GENERAL INFORMATION OF BSR ASSOCIATES:

ITEM 1: EXPERIMENT WITH THE CAMERON "WATER COMPASS": At a special meeting for purpose of obtaining technical information from the MP Controls, Sept. 17, 1951; Mr. Verne L. Cameron being present; Mark P. in deep trance and under control of Ramon Natalli: the Control proposed an experiment, saying -

"I am going to leave Mark in trance but get out of his body and go in front of his table, and then Cameron can try to find me with his compass"

After a minute or so Cameron investigated the space in front of the table and said: "The instrument shows the form of some one sitting down cross-legged partly under the table and with his face turned toward Mark."

Natalli again took control of MP and said: "That is exactly right. I sat down and faced Mark because you would naturally expect me to be standing and facing Cameron. I wanted to see if he could get it correct."

Further experiments indicated (as previously in tests conducted by Max Freedom Long) that a visualized or "projected" object (being also an etheric existent) can be detected and delineated as accurately as an etheric person (spirit).

This seems to be (as far as my knowledge goes) the first accurate delineation of etheric objects by instrumental means, and not dependant on psychism. The implications (and problems) of this are numerous and extraordinary. The Professor Luntz Control remarked: "You stand at the opening of a new era of scientific investigation."

ITEM 2: We are making slow progress on setting up the oscillator unit of the the "Chiga" experimental Disc, due mainly to difficulty in obtaining button-shaped magnets.

ITEM 3: A number of incidents seemed to indicate that NIKOLA TESLA (d.Jan.'43) was trying to communicate with Assoc. Cameron. The Controls asserted that this was a fact. The alleged communications were highly technical in nature and were received via the "water compass", the bob of which picked out words on an inverted book-page while the operator was <u>not</u> looking at it. The importance of possible assistance from this distinguished scientist cannot be over-estimated.

ITEM 4: Concerning the Flying Discs and other related craft: These visitors are still with us (though reports are often suppressed or played down by the press. We hope to be able, perhaps within three months, to reveal the identity of the famous "Dr.Gee" of Scully's book, together with something of his distinguished scientific background. He has not deviated from his original statements. As Associates of the BSR, we can congratulate each other on having been able to offer, from the very first, an intelligible and comprehensive explanation of the Discs & other related phenomena - and the <u>only</u> such explanation publicly offered anywhere.

SPECIAL ACKNOWLEDGMENTS to BSRA Regional Director DON GREEN (9121 South Dale Ave., Rt.2 Anaheim, Calif) - for a six-foot list of sightings and other data, re Flying Discs - and for a three-foot list of quakes and shakes "around the world at the 40th parallel". If we only had time, help, money and strength to publicise the material our excellent co-workers dig up for us - !!!

M.L.

During the last five years, and down to the present, there have been no data, of the type which we consider evidential and valid, which either rule out the etheric hypothesis or even make it improbable. On the contrary, all additional evidence fits in and confirms the original account as given by the Mark Probert Controls, and as repeatedly offered in BSRA publications.

ITEM 5: A matter of very grave importance is hinted at in the few lines I am about quote. They accompany a startling and plausible report from BSR Assoc. E.S.S.

"The gist is, and this much you can reveal, that the breaking of the sonic barrier by jets (and in other ways) is disturbing etheric matter & the etheric people as well, and that they are apparently intervening already and may do so to far greater extent later on."

We were told by the MP Controls some five years ago, that atomic fission (the atobomb) had serious repercussions on the etheric planes and people, and these latter might intervene in our affairs as a matter of self-defense. To the atobomb effects let us add those of ultrasonics. Let us add, too, the one word time-lag. Your Director hopes that it will soon be possible to speak freely and in detail on this matter.

ITEM 6: We hope that many of our Associates will undertake systematic and controlld experiments in the matter mentioned under Item 1. They do not have the water compass, but we recommend that persons interested refer to page 3 of Release 8-1-51 concerning a cheap substitute for that instrument. Do not disregard it because of its simplicity, or because at first or 2nd or 10th trial it seems to be useless. Give five minutes a day to it and get it "tamed" - which means taming your own forces. -- Try similar experiments with the Wallace ZNO. My guess is, with patience you can get excellent results -- for us here at HDQRs the chief interest is in the detection of etheric objects and persons, and somewhat less in water dowsing and "regular" radiosthetic experiments.

What we want, of course, is brief reports of controlled experiments. In all ventures of this kind, there is a plague of excited and enthusiastic people reporting sensational (& dubious) results, and bringing discredit on serious investigation. "Critical receptivity" is a good motto for BSR Associates.

No water compasses have been manufactured for sale. The ZNO may be purchased from Mr. George Wallace, Box 158, Beaumont, Calif. ($3.50).

ITEM 7: Affairs of the BSR FOUNDATION: This is a legally incorporated entity formed to advance the general work of the BSRA and carry on related projects. It is thus unique in its purposes and functions. Donors may make contributions to the Foundation rather than to BSRA or any individual, and the Foundation will allocate funds to meet expenses of BSRA projects and investigations. Secretary-Treasurer, Harriet P. Foster, BSRA, 3541½ Sixth Ave., San Diego 3, Calif. Refer to page 26 in Round Robin vii-2, July-August 1951, for further information.

The above by no means excludes donations direct to the BSRA and/or Round Robin, if the donor so prefers; but we wish our Associates to be informed of the existence of the Foundation and our relation to it. Like the BSRA, it is a non-profit and educational set-up. The Projects are novel, interesting, and extremely important - and are not being studied by any other organization so far as is knownto us. If you have generous and intelligent friends who are more interested in service than in financial gains, tell them about BSRA and BSRF.

- Sept.1951 - M.L.

This is a RELEASE and not part of Round Robin vii-3 - but is sent out along with vii-3 to save postage and to get it to our Associates as quickly as possible. Ordinarily, Releases come in between issues of RR. But your Director has been almost without office help and all work has gotten badly in arrears. ML
